

Turkey Plant- Flowcrete Flooring

CLIENT: Jennie O - Turkeys
 LOCATIONS: Pelican Rapids, MN
 Montevideo, MN
 PROJECT DATE: 1999-2003
 AREA: Various areas
 thought out the plant

PROJECT DESCRIPTION:

Ultra Fresh Anti Microbial

Flowcrete, one of the only flooring systems that contains an Anti-Microbial additive throughout the entire ¼" flooring system. Ultra-Fresh inhibits the growth of bacteria, fungi, molds and mildew including but not limited to:

- *Listeria welshimere*
- *Salmonella choleraesuis*
- *Escherichia coli*
- *Staphyococcus aureus*

After experiencing a number of failures with different contractors and flooring systems, Vector Construction Inc. was contacted to discuss the possible solutions to their flooring problems. Upon reviewing the chemical environment and the thermal shock conditions present in the plant it was decided that a Flowcrete HQ Flooring System would be installed. Once installed the Flowcrete Flooring System has proven to be a very durable, hardwearing flooring system which is capable of standing up in environments where other flooring systems have failed. All work has been completed over short duration plant shutdowns where attention to scheduling and planning is essential to ensure projects are completed on time and on budget.

Flowcrete Flooring offers a number of advantages including:

- **Fast Curing** ... can be returned to service within 5-8 hours of being installed.
- **Ultra Fresh Anti Microbial** ... is one of the only flooring systems that will inhibit the growth of bacteria, fungi, molds and mildew.
- **Odor Free** ... no risk of contaminating food in adjacent rooms.
- **Thermal Shock Resistance** ... Can withstand hot water, process spills or steam wash downs daily.

Surface Preparation

Attention to surface preparation is essential to ensuring bonding of the Flowcrete Flooring System and the long term performance of the floor. All surfaces were scabbled to remove the top layer of grease and oil contaminated concrete.

While many contractors will cut corners on surface preparation Vector's years of experience enable us to ensure your project is completed properly, on time and on budget.
